

"Quick" modes take too long due to scrolling messages

Lots of unnecessary, confusing features

Poor organization of buttons

Too much STUFF!

OLD

NEW

Detented Time Wheel adds 5 sec. per click at slow speed, 20 sec. per click at high speed

The Time Wheel can set cook time or a kitchen timer

Lights indicate the current Power Level, and they turn off in Timer Mode

The integrated stovetop functions are maintained for above-range units
