VISALERT METER

enabling meter checking at-a-glance, from a distance

Now:

broken!

photo by: itspaulkelly

Can't tell from a distance how much time is left

No inherent way for users to tell Parking Authority about broken machines
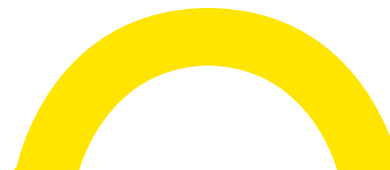

No built-in way for users to warn others about broken machines

New:

Lighted Top: top illuminated with color symbolic of time remaining for at-a-glance reference

No need to worry, plenty of time left

Less than 10 minutes left

No time remaining, ticket imminent

Lights up white at night to illuminate sidewalk

Maintenance Button: used to indicate the need for repairs, stays pressed until reset by technician to show error status

Unpressed: In working order
Depressed: Error reported
