

Heated Mirror Control

Current Design Problems:

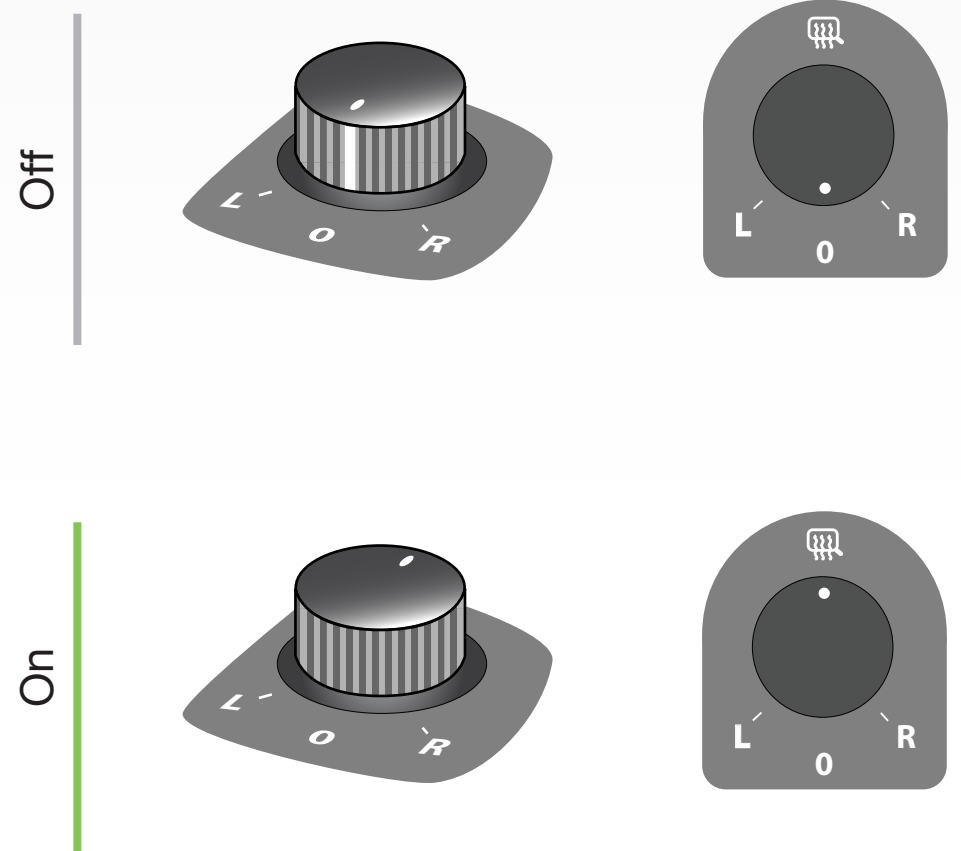

- Non-discoverable placement (can't see the control)
- Status is hidden from driver
- Easily able to forget and leave on

Location in Car

Driver's Perspective

Top View

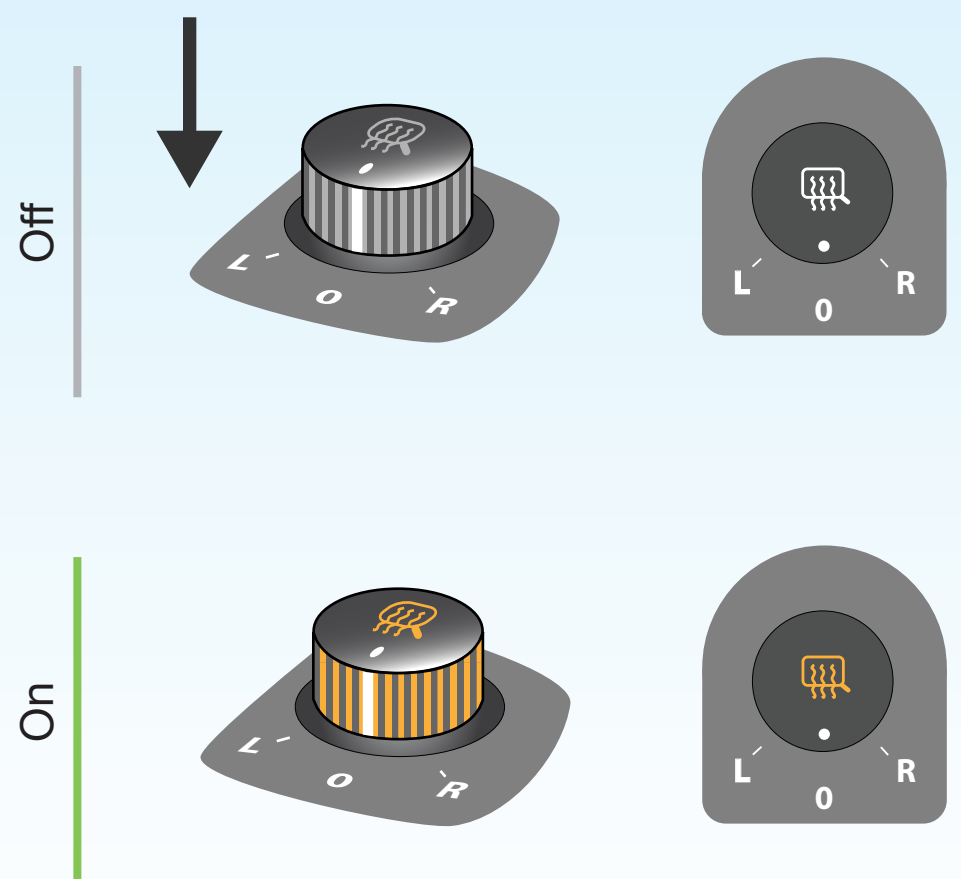

Redesigned Solution:

- Easily-discoverable
- Status is apparent
- Automatically shuts-off after 10 min

- Driver presses down to activate
- Another push turns off heated mirrors

- Mirror symbol and knurling double as LED-lit status
