The Toaster Timer
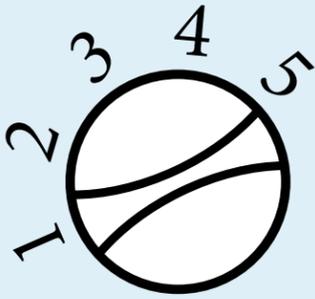

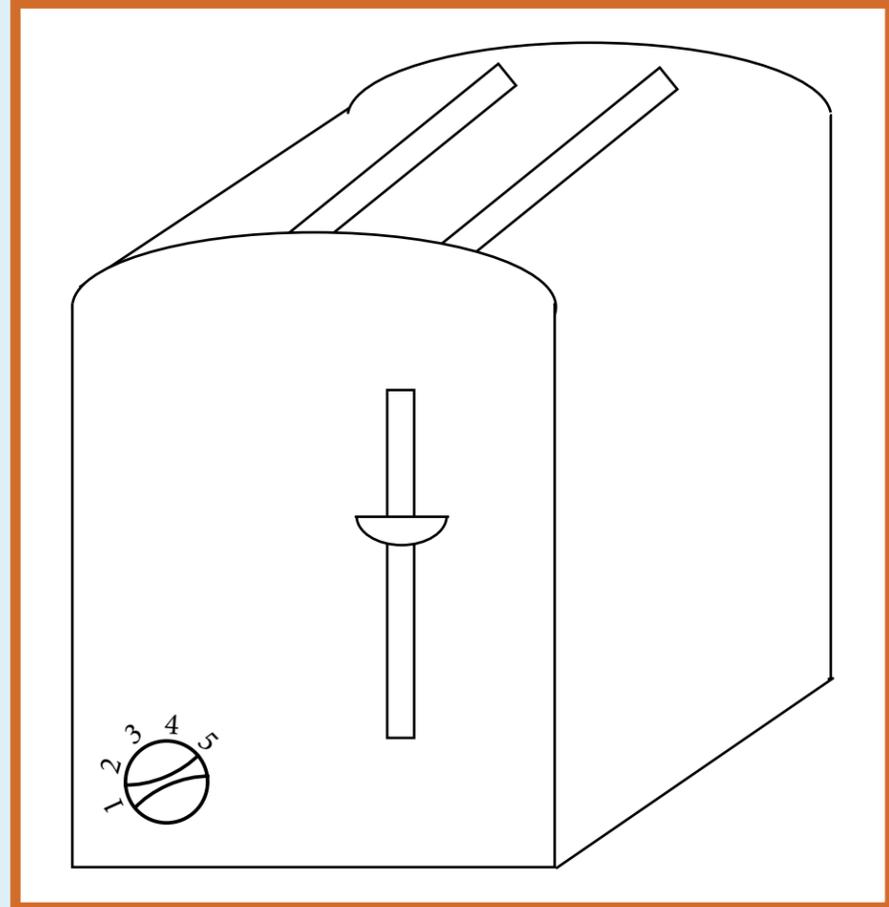

## Problems

» Timer dial has an ambigious pointer. It could be poiting to 1 or 5.

» Using mintues doesn't convey the easiest relationship to describe desired crispiness.

Solution

Off   Warm   Crisp   Burnt

» A Slider instead of dial. No ambiguity about selection.

» Marking on the slider are "Off", "Warm", "Crisp" and "Burnt". It is easier for the user to select the desired crispiness.

» Measure of time by scale and not by numbers.
