ALARM CLOCK
snooze button and time button redesign

new design

improvements

larger controls: dial vs. tiny buttons

visible controls

less error prone: dial moves forward and backward

separate controls for hour and minute

easy to tell mode: face down to set alarm

snooze button is a button with good feedback

interaction

ROTATE dial to set time

PUSH down on button to snooze

POSITION sideways for time view
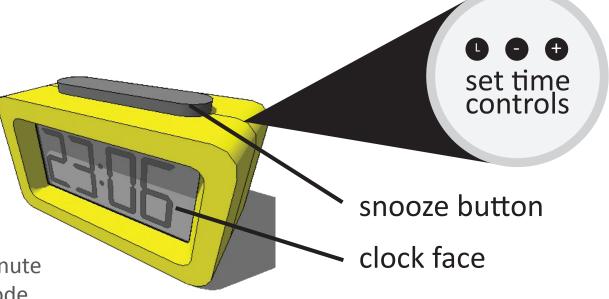

similiar controls

kitchen timer

combintation lock

arcade buzzer button

old design

design concerns

small controls--hard to use

hidden controls

repetitive "push" to set time

same controls for hour and minute

hard to tell if time or alarm mode

snooze button doesn't feel like a button: bad feedback

set time controls
